- (French) Navy diving (Jean Morin) (10 min)
- Recreational Diving (Alessandro Marroni and Laura Marroni) (10 min)

Discussion / questions (moderated by Jacek Kot / Gerardo Bosco)

Conclusion (Ole Hyldegaard)

The COVID-19 pandemic has profoundly changed the way we practice diving and how we apply hyperbaric oxygen therapy. One year after the start of the pandemic, it is time to examine the effects of SARS-CoV2 on our daily practice and how hyperbaric oxygen therapy may even help treat COVID-19 patients. Please tune in to this EUBS Webinar for a comprehensive overview of the most relevant developments in the last year !
